Experience

ECCO Safety Group Internship; Boise, ID - Summer 2017

I received an internship at ECCO Safety Group and was tasked with designing and programming a light engine tester. This assisted me in understanding how the automobile standard Control Area Network communication works. Also gave me experience in working in an office and in a professional setting.

Rafting Guide, Calvary Chapel; Boise, ID - 2012 - Present

I was a rafting guide for my local church once or twice a week over the summer. I would guide 8 to 10 people down the Main fork of the Payette or The Cabarton River Run in a large raft as part of the bigger group.

Education

Sage International School; Boise, ID — High School Diploma, 2016

- Charter school with the International Baccalaureate Program
- First graduating class of Sage

Colorado School of Mines; Golden, CO — Undergraduate, Expected Grad Date 2020

- Electrical Engineering Major
- Clubs; Solar Decathlon Team, Poster Club, Mines Entrepreneurship and Innovation

Skills

- Programming - Python, C++, GoLang, Javascript. <https://github.com/gageco>
