EDUCATION

Colorado School of Mines; Golden, CO - 2016-2018

Boise State University; Boise, ID - 2019-Ongoing

I am going for my undergraduate degree in Electrical Engineering

TECHNICAL SKILLS

Programming Languages

Python, Go, Javascript, Java, C++, C, Solidity, HTML/CSS

Software Experience

Programming: Seven years of programming experience including writing and interfacing with REST APIs, embedded systems, automated systems, web servers, and machine learning

3D Modeling: Solidworks Associates, AutoCAD Experience

Hardware Experience

Circuitry, breadboarding, PCB assembly, welding, wood and metal shop training

TECHNICAL EXPERIENCE

ECCO Safety Group Internship

At ECCO Safety Group, based in Boise ID, I was tasked with designing and programming a light engine tester. This assisted me in understanding how the automobile standard Control Area Network (CAN) communication works. I used an Arduino with a CAN attachment to send and receive signals to and from the CAN bus. eccosafetygroup.com

Royal Jay Internship

Royal Jay is a healthcare software company based in Boise ID. I was tasked with looking into the feasibility of Machine Learning in its software applications. This was done using anonymized test data set where I ran different regressions to see what fit the best and could be used to most effectively predict healthcare outcomes. This has resulted in a division of its business being focused on machine learning applications in healthcare. royaljay.com/

Mines Entrepreneurship and Innovation Challenge Finalist: I and a team of peers competed and were finalists for a mining related entrepreneurship and innovation challenge where we were tasked with finding, designing and building a solution to make mining more efficient and safe.

EMPLOYMENT

Math Tutor: (2019-Ongoing) I am a math tutor for kids from Elementary to High School. To do this effectively I have to keep a working knowledge of a broad range math principles, and be able to teach various learning styles. This has helped me improve my communication skills for concepts that might prove difficult. In 2020 and 2021 where many schools have gone online, this has been especially important.

Sykes Customer Service Rep: (2019-2020) Right prior to the COVID-19 leading to the shutdown in the US I joined Sykes as a Customer Service Representative. This was my first experience working from home, where I adhered to the Sykes working at home policies. At this job I consistently got good reviews from the folks I helped and from my supervisor.

Woodcraft of Boise: (2018-2020) I was a manufacturer at Woodcraft Boise, I ensured that the products we made were in stock, and shipped out on time. I also had to maintain a clean workspace and that all shop safety guidelines were followed.

Rafting Guide: (2016-Ongoing) I am a raft guide for my local church a weekends over the summer. I guide people down the Main fork of the Payette or The Cabarton River Run in a large raft as part of the bigger group. This has honed my leadership skills and given me the ability of thinking clearly under pressure.
